

Hack 4 Good

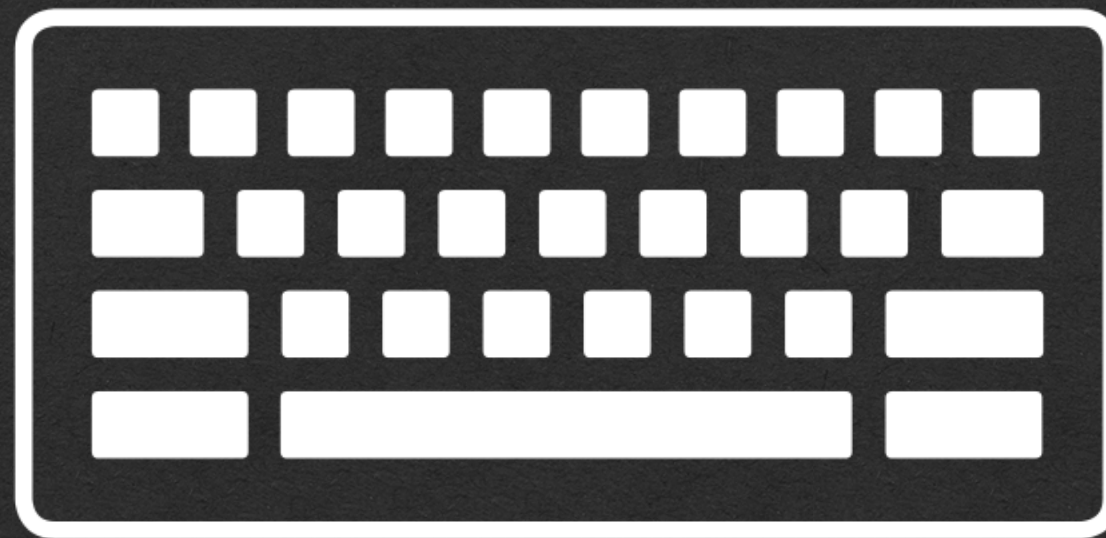

Top tips for accessibility

Heidi Laidler- Inclusive UX Designer

Accessibility Toolkit

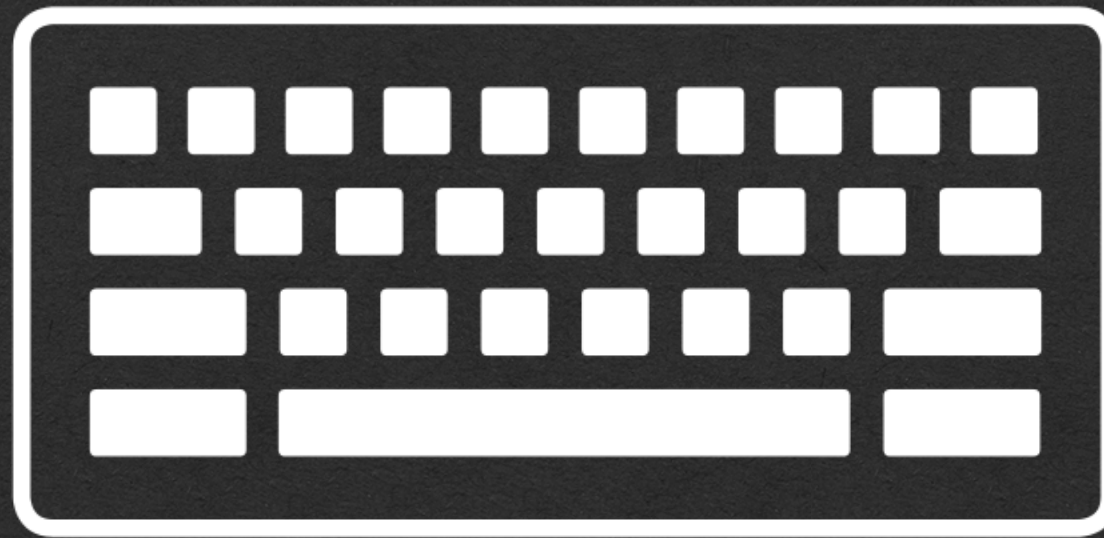

Keyboard

Some people navigate
using the keyboard only.

Keyboard

Try navigating your website using the keyboard only.

1. Can you access everything?
2. Is it easy?

Screen Reader

Some people use screen readers
to audibly announce content.

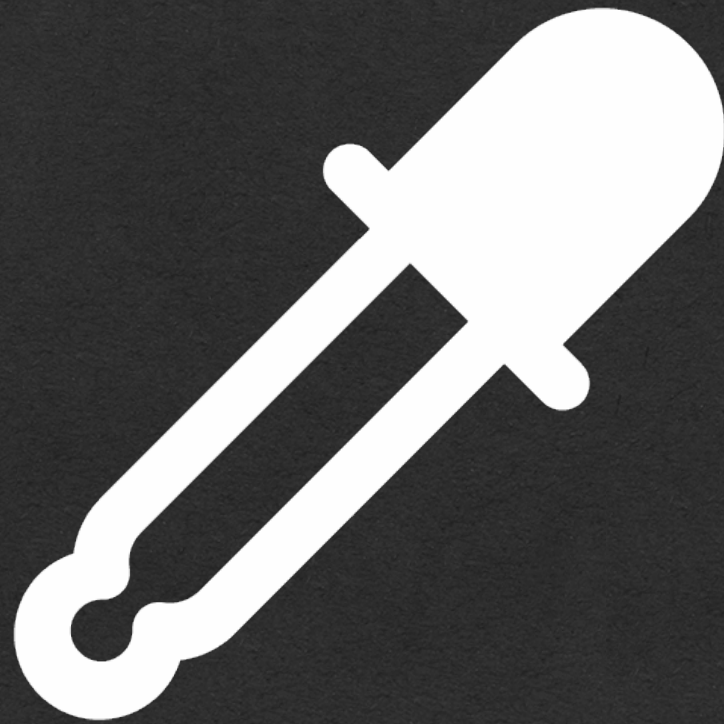

Screen Reader

Try navigating your website with NVDA.

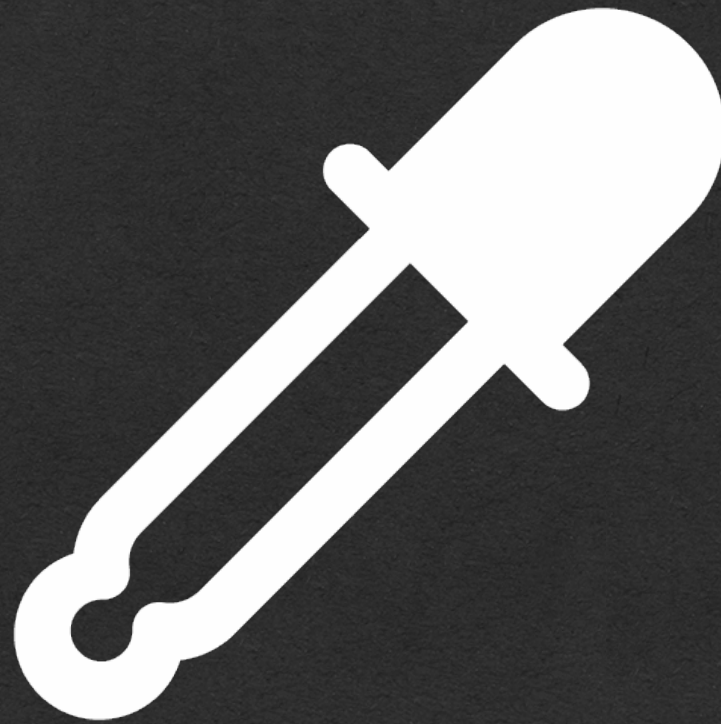

1. Can you access everything?
2. Is all of the content read out?
3. Is it easy?

Colour Contrast Analyser

Some people need websites and apps to have high colour contrast.

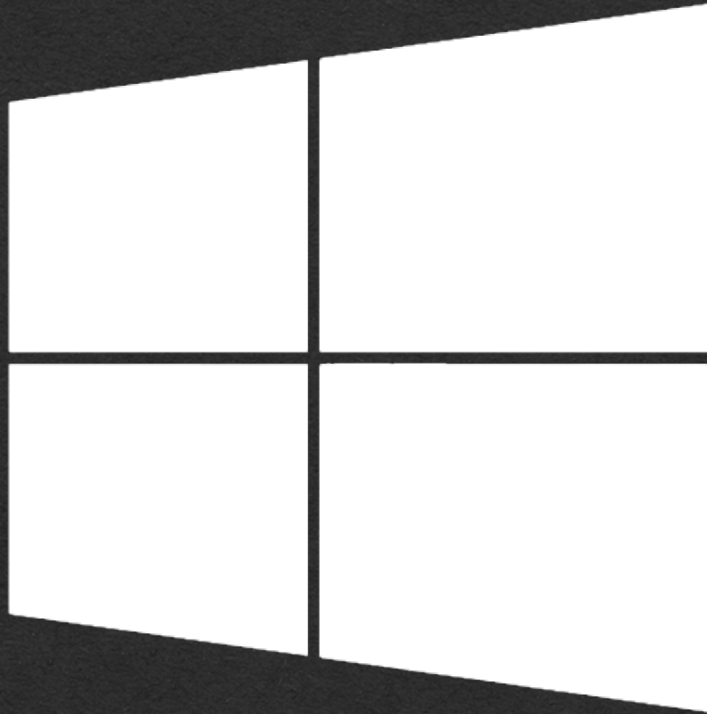

Colour Contrast Analyser

Use Paciello Colour Contrast analyser to test the colours in your design.

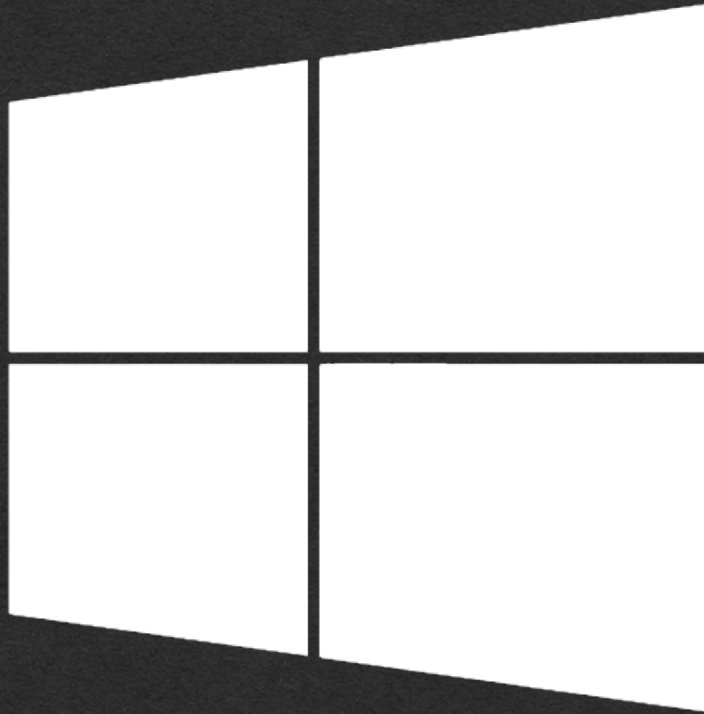

1. Do all colour combinations pass?

Ease of Access

Some people use Windows
Accessibility Settings.

Ease of Access

View your website using high-contrast mode.

1. Does anything disappear?

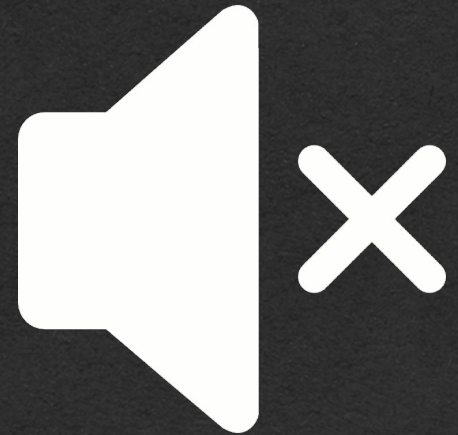

Other Tools
